Recent Archaeological Discoveries at the New Lake Vermilion State Park

Dave Radford

Minnesota Historical Society Archaeologist

7:00 p.m., Tuesday November 9, 2010
Ft. Snelling History Center Auditorium

Hundreds of historic mining features, a newly identified chert quarry, and a lithic site yielding obsidian are some of the recent archaeological finds at the new Lake Vermilion State Park. Although field survey of the new park is still underway and will be for several years, MHS archaeologist Dave Radford will give a summary

of findings to date. Samples of chert from the newly identified quarry will be on display. Come see some photos of Minnesota's new state park!
